CITY MILK INSPECTOR

Regarding the investigation relative to possible typhoid infection from milk distributed by George S. Beise, Dr. Paul F. Gadle, city milk inspector, said Thursday that he has received no complaints regarding the milk sold by Mr. Beebs, Dr. Gadle said that as customary he has taken samples of milk from various dealers and has forwarded the samples to the Connecticut state department of health for analysis. In the reports received back Dr. Gadle says there was never any mention of infection in the milk, such as typhoid, diphtheria, scarlet fever, etc. The report, he says simply gives the percentage of bacteria in the milk, the percentage of water, the percentage of cleanliness and the general grade.

When the inspector receives a complaint of possible infection in milk the sample is then sent to the New Haven.
